Walking with Attitude Poses just released!

Our Walking with Attitude poses package just released. It supports Genesis 8 and Genesis 9 Male and Female

This is a handy, must-have package of walking poses that are both natural looking and stylish.

We created it to give characters that extra dose of flare even in one of the simplest situations: walking.

All poses include mirrored versions for even more versatility and partial poses matchability.

These are perfect for those who want to go places, with style!

[Check it out!](#)

This product release newsletter is short and essentials as we've been VERY busy finishing up our next release. A skin Effects construction kit for our Wasteland theme (sneak peek just below).

Hopefully we'll start showing some previews on Instagram and Artstation in the next few days. We were thinking about reviving our DeviantArt account as well, but that may be putting too much on our plate.

We've also been working on other things on the side. Among other things : some useful Daz Studio tips for our YouTube channel (to be posted soon) and our new official Logotype, which we'll finally feature in the next newsletter :).
